

MANOJ R NAIK

Bengaluru — 9901867819 — manojnaik0330@gmail.com — LinkedIn — GitHub

Professional Summary

Passionate about software development with the habit of learning by building. Looking for an opportunity to grow within a professional team, strengthen my technical foundations, and contribute to products that make a real difference.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, SQL, C

Software Engineering: Data Structures Algorithms, Object-Oriented Programming, Software Development Lifecycle (SDLC), Code Reviews, Testing, Debugging, Documentation, Problem Solving

Backend Development: Node.js, Express.js, RESTful APIs, MVC Architecture, Socket.io, Authentication, WebSockets, API Development

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB

Tools Technologies: Git, GitHub, Postman, OAuth, Version Control

Development Practices: Agile Development, Collaborative Development, Feature Implementation, Technical Documentation, Software Testing

Projects

Skribbbly – Real-Time Multiplayer Drawing Guessing Game

Live Demo

Next.js — Node.js — Socket.io — TypeScript — Tailwind CSS

- Developed and maintained a real-time multiplayer web application using JavaScript, Node.js, TypeScript, HTML5, and WebSocket technologies.
- Implemented WebSocket-based communication for live synchronization, chat functionality, room management, player tracking, and real-time game updates.
- Designed and implemented new application features including scoring systems, round management, timer-based gameplay, and event-driven backend logic.
- Participated in testing, debugging, performance optimization, and feature enhancements to improve application reliability and user experience.
- Documented application architecture, development workflows, and implementation details to support maintainability.

Finovex – Personal Finance Management Web Application

Live Demo

Next.js — TypeScript — REST APIs — OAuth

- Built a full-stack finance management web application supporting transaction tracking, budgeting, savings management, and financial goal planning.
- Developed and integrated RESTful APIs for CRUD operations, secure data management, and application workflows.
- Implemented OAuth-based authentication and user account management features.
- Applied software engineering principles to create modular, maintainable, and scalable application components.
- Conducted testing, debugging, feature validation, and continuous improvements to enhance application stability and usability.

Fantsea – Event Service Showcase Website

Node.js — Express.js — MongoDB — HTML — CSS

- Developed and maintained a responsive web application using Node.js, Express.js, HTML, CSS, and MongoDB.

- Implemented frontend interfaces and backend functionality to support content management and service presentation.
- Collaborated directly with stakeholders to gather requirements, implement features, and deliver project updates.
- Participated in testing, debugging, deployment, documentation, and overall project delivery throughout the software development lifecycle.

Certifications

- React – The Complete Guide (Maximilian Schwarzmüller)
- The Web Developer Bootcamp (Colt Steele)

Education

Bachelor of Science in Information Technology (B.Sc. IT)
University of Mumbai

2019 – 2022
CGPA: 8.4
